EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Krause on March 20, 2006.

The application has been amended as follows:

Claim 6 lines 1-2, "The sensor of wherein the piezoelectric foil/the piezoelectric foils have a cylindrical shape, and have been" has been replaced with -- --The sensor of claim 2, wherein the piezoelectric foil has a cylindrical shape and is -- --

The following is an examiner's statement of reasons for allowance: The prior cited art references do not disclose a piezoelectric member that tightly surrounds the lateral surface of a cylindrically shaped viscoelastic unit, as required by independent claims 1 and 10. While Brewer discloses a viscoelastic unit 15 which is cylindrically shaped, there is no suggestion in Mohler to have the piezoelectric member 320 surrounding the lateral surface of a viscoelastic unit, as defined in figure 3 of Applicant's drawings. The combination of Mohler and Brewer would merely disclose a transducer embedded in a viscoelastic unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
